a being that of the leader of a gang of counterfeiters in Hilinois, some years ago. The great fair recently held in St. Louis yielded to the Association a profit of \$17,000. Above \$32,000 se expended in premiums, if reports are correct, and other expenses are estimated at \$10,000.

kinds of preaching, enumerates the dry, the metaphysical, the pictorial, the expository, and the topical. The latter, it says, is the most popular of all. A staff of surveyors have been making preparations in London for laying down rails for an experimental line of horse-railway in London on the plan of Mr.

The New York World, in an article on different

George Francis Train, who has successfully introduced a horse-railway into Birkenhead.

Turk's Island, West Indies, at a salary of \$2,000 per annum. The Consulship embraces three Islands in the West Indies, and the climate is most salubrious. WHAT MES Wright.-The average weight of 4269 men, weighed at the Mechanic's Fair in Boston, was 146 pounds 13 ounces. The estimated average in Belgium is 140.40 pounds; in France, 136.89 pounds; and in England, 150.98 pounds.

Miss., are manufacturing about fifteen hundred pounds of artificial leather daily, from scraps of eather and old pieces of rope. It has not been introduced out of New England, yet the demand is reported to be greater than the supply. The process of making is similar to that of manufacturing paper. Coas On.-It has been well said, that a single year's crop of corn is worth more than all the gold of found that it produces a clear fluid that burns without odor, without smoke, and is inexpensive, affording a clear light in an ordinary kerosene lamp for half a cent an hour. The corn oil is as clear and

The Caloric Engine of Ericsson is rapidly introducgale has been established at Bockham, near Magdeand placed under the charge of a machinist who was gest to America on purpose to study their construc-A MILLINER GIBL DANCING WITH THE PRINCE.

coloriess as water.

At the ball given to Lord Renfrew at the Academy of Music, New York, the Prince opened the dance with the lady of Gov. Morgan. Richly dressed, possessed she represented something more than official station. She was the exemplar of American life, progress, industry. In her youth she was a poor girl, earning her livelihood as a milliner apprentice. Her upwards growth is but a common specimen of the strange but goodly incidents of republican life. N. Y. World. PRESERVATION OF GAS AND WATER PIPES.-In scientific matters there is an item worth recording which may save English companies some hundreds of pounds per annum if they will take note of it. I allude to the discovery of the fact by a Frenchman that iron gas pipes and water pipes may be kept from rusting by laying them in a bed of clay. It is the

ing steamship Connaught, is likely to be rewarded Prince's request. for his deed. The New York agents of the Connaught have set on foot a subscription to get a tesmonial for him. The passengers have already raised a sum sufficient to purchase a beautiful chronometer. The Bostonians have also a subscription

In three days, the New York subscription exceeded five thousand dollars. IS THE SUN GROWING COLD AND DARK?-There are now more spots on the sun than have been seen before for many years; some of these are visible through a smoked glass to the naked eye. Several stars-some of them of great brilliancy, which, from their ascertained distance, must have been as large as our sun-have totally disappeared from the sky; and the question has been raised among astronomers, whether the light and heat of the sun are gradually fading away. As this would be accompanied by the destruction of all the plants and animals on the earth, it is rather an interesting question. The sun's light and heat are diminished by the dark spots at the present time about one per

cent .- Scientific American. EXPERIMENT WITH AN IDIOT .- Dr. Madio relates that an idiot at Salzburg, appearing to be singularly insusceptible of fear, an experiment of an appalling character and appalling consequences was made upon him as a means of putting his susceptibility to a test. It was proposed to produce in him the impression that he was with a dead man come to life. A person, accordingly, had himself laid out as a corpse, and enveloped in a shroud, and the idiot was ordered to watch over the dead. The idiot perceiving some motion in the corpse, desired it to lie still ; but the pretended corpse, raising itself in spite of this adconition, the idiot seized a hatchet, which unluckily was within his reach, and out off first one of the feet of the unfortunate counterfeit, and then, unmoved by his cries, cut off his head. He then calmly resumed his station by the real corpse.

Henduras .- A New York Herald correspondent in giving an account of the exploits of Walker, says the country around Truxillo, for an extent of three hundred miles along the coasts, is by nature, the richest part of the continent of America. The gold fields are said to cover an extent of upwards of 200 miles in length, and 100 in breakth, and ought to yield upwards of \$10,000,000 per annum, while silter, copper and timber, would if properly handle !, yield as much more, to say nothing of agricultural produce, sugar, cotton, coffee, etc., that might be raised to an indefinite extent. As an illustration, he mentions that five years since, about a hundred foreigners got into the country, and in the space of three months realized upward of \$60,000 of gold, when sublealy a stop was put to their operations, and they were forced to leave. What is wanted, the correspowient thinks, is free trade and a free population.

A New STEAMER.-The N. Y. Times thus describes a large and magnificent steamer to be built in N. York for the San Francisco and Panama route :-- " The Pacific Mail Steamship Company have just entered into a contract with William H. Webb for the construction of a large steamer, to be placed on the San Francisco and Panama route. Her dimensi ns will be as follows: Length on deck, 340 feet; breadth of beam, outside, 45 feet, 44 feet moulded, and depth of hold 32 feet. She will be one thousand tons larger than the John L. Stephens. Her engine is to be of the single beam variety, with a cylinder of 9.5 inches dinmeter, and 12 feet stroke, and having extra capacity of boilers. She is to be constructed of the very st materials, with diagonal iron straps-her construction to be under the superintendence of Captain Skiddy. The internal arrangements of the ship will be such as the long experience of the Company has discovered to be the best adapted to the increasing trade of California. The increased size of this steamer over the other vessels of the line is rendered becassary on account of the demand for freight-room, so that the new steamer, while she will be better provided for the accommodation of passengers, having her two upper decks devoted to that purpose, the whole lower deck will be used for freight-room. She will have water-tight compartments; and special attention is to be paid to the ventilation of the passengers' department, the state-rooms and the steerage excelling, in their commodiousness, any passenger steamer yet placed on the route. In model, the new steamer is intended to be one of the most approved of Capt. Skiddy's, combining great buoyancy and carrying capacity with rapid sailing. It is intended

that she shall make the Pacific trip in ten days. NEW MOTIVE Power.-The Paris correspondent of the London Star states that the whole of the scientific world is in a state of revolution at the bare prospect of the success obtainable by M. Lenoir's new motive power, for which we have been prepared for many months past. The trial has been made at list, and the result has excited the greatest interest

throughout Paris. As usual in all great discoveries, that made by M. Lenoir is founded upon the samplest fact in science, being merely the application upon a large scale of one of the elementary experiments of chemistrythat of the synthesis of water in the raidometer. has simply utilised the principle of the expansion of air when at a lofty temperature, by means of combustion through the spark induction of hydrogen. The economy produced is calculated at not less than forty per cent. by the suppression of the boiler, the chimneys and the other accessories hitherto used in the construction of steam engines. The machine it-

self offers a saving of thirty per cent. Several machines, varying from five to ten horse power, constructed by Marinoni, have been dispatched to England and Belgium. M. Hardouin has ordered one of twenty horse horse power for the works hurrying on the Isthmus of Suez. This new machine, which seems to realize every dream of the inventor and manufacturer, by offering an immense result of power in exchange for a merely nominal supply of fuel, is about to be tried on some of the French railways. Until then it would be premature to pronounce the assertions made by the inventor and his friends as the results of proof.

VICTORIA'S FIRST MOMENT OF SOVEREIGNTT, William the Fourth expired about midnight at Windsor Castle. The Archbishop of Canterbury, with other high functionaries of the kingdom, was in attendance. FRESH CROCERIES As soon as the King had breathed his last, the Archbishop quitted Windsor and made his way to Ken-Sington Palace, the residence at that time of the Princess Victoria, where he arrived before daylight, and announced himself, requesting an immediate interview with the Princess. She hastily attired herself, and met the venerable Prelate in the ante-He informed her of the demise of the Crown, and did homage to her as the Sovereign of the nation. She was at eighteen Queen of the only realin, in fact or history, on which the sun never sets. She was Mines meats. deeply agitated. The first words she uttered were Sage, these: "I ask your prayers in my behalf." They Sweet knelt down together, and the young Sovereign inaugurated her reign. like the young King of Israel, by asking from on high " an understanding heart to judge so great a people, who could not be numbered nor counted for multitude."

THE PRINCE'S DEPARTURE.—The royal journey is at an end, so far as America is concerned. The Prince and his suite having been feted and lionized A CLERICAL CONSUL -President Buchanan has at Boston in the most classical and Athenian manappointed the Rev. Andrew G. Carothers, late paster | ner, left the city on Saturday forencon, October 20th, the church in Washington, D. C., as Consul to and proceeded to Portland amid enthusiastic cheers from the citizens, and accompanied by Governor Banks and other distinguished gentlemen, for Portland, where he was received by the Governor of the State of Maine, the Mayor of Portland, a respectable body of military, and the entire population. He was escorted through the streets of the city, and finally embarked on board the British war steamer flero. The incidents attending the departure are

A NEW PATENT LEATHER .- A firm in Amherst, At last the Prince's barge, which bore his plumes guns of all the ships thundered a salute. This was repeated, the ships bands playing "God save the Queen," "Hail Columbia," and "Yankee Doodle,"

as the Prince sterred on the Hero, and instantly the FAMILY DRUG STORE!

BY J. M. SMITH & GO. as the Prince stepped on the Hero's deck, at half-past four o'clock. Lord Lyons, and other members of the party, remained some time looking at the ship. They then enjoyed the hospitalities of Mayor How-California. In addition to its other use, it is now ard, and returned to Boston at six o'clock the same evening. The harbour was full of steamers, sailboats, barges, &c., which accompanied the royal barge from the wharf, the latter being surrounded by boats from the royal squadron filled with British officers. There was a fresh easterly breeze blowing, and the water in the harbour was quite rough, so isg itself into printing officers and machine shops of that the boats rowed quite slowly. As the flotilla Germany. A manufactory of these engines on a large neared the royal squadron the yards were manned, and this, with the strings of bunting and flags flying burg, by the Hamburg-Magdeburg Engine Company, from every point of the fleet, formed a magnificent spectacle, which was witnessed by an immense concourse of people assembled on Mount Joy, the various piers, and every accessible place of observa-

As the royal party passed the various vessels of the squadron, the Prince was received with repeated cheers, and when he reached the Hero, at ten minof all the grace and dignity bentting her station as utes before four, the royal standard was run up to the wife of the Chief Magistrate of the Empire State, the "main," and another salute fired by all the fleet. The rigging of each vessel was instantly stripped of the bunting, and the sailors disappeared

from aloft. At half-past four the squadron sailed, steering out of the harbour, the Hero leading, followed by the Nile, Ariadne, Flying Fish, and the Styx, saluting and being saluted by the fort as they passed.

A PEN-AND-INK PORTRAIT OF THE PRINCE -A pen-and-ink portrait of the Prince in uniform, as a British colonel, has been presented to him by David Davidson, the artist. The peculiarity of the picture is that the Prince's figure is composed of Washington's farewell address, distinctly readable discovery of a French workman, who observed the with a microscope, and that the frame of the picture filled. The Public are invited to give a PAVING call. 250-36 effect on iron pipes in various soils.
